

## Toxic America Excerpt

By Curtis R. Crim BA

One thing that breaks my heart about America is that we have all been collectively brainwashed into thinking, “there is nothing that I can do about it.” The average person feels so intimidated by the gigantic Federal government, by Corporations, and by the ultra rich, that he automatically accepts that he has no real power in the world.

Believe me, the Ultra Rich Corporate Lords (URCL) want you to feel exactly like that. After all, we are brainwashed with the notion of freedom and democracy, where in reality we are slaves. In order for a slave to behave properly, he must feel utterly helpless, right? After all, the USA couldn't afford another Spartacus situation!

I feel strongly that we are not nearly as helpless as we are brainwashed and manipulated into thinking.

Perhaps it all comes down to attitude, and I am free if and only if I truly believe that I am. It appears as though the brainwashing itself is that which keeps me in “chains”.
